TRUE OWNERSHIP

SKILL REWARDS

YOUR VOICE

FortisArena envisions a gaming ecosystem where:

- **✓ Every player has TRUE ownership**
- **✓ Every skill is REWARDED**
- **✓ Every voice MATTERS** in shaping the future

The traditional gaming industry has long operated on a model where players are consumers, not stakeholders. Despite generating billions of dollars in value through their time, skill, and engagement, players have historically received little in return. **FortisArena changes this dynamic fundamentally.**

## ⚡ 3. THE PROBLEM

### 3.1 INDUSTRY OVERVIEW

Plain Text

GLOBAL GAMING MARKET

	Revenue:	\$180+ BILLION annually
	Players:	3.2 BILLION worldwide
	Growth:	8.7% CAGR
	Player Share:	< 5% of generated value

## 3.2 CRITICAL ISSUES IN MODERN GAMING

Issue	Problem	Impact
<b>Centralized Control</b>	Platforms control all assets	Players lose everything if platform shuts down
<b>Unfair Revenue</b>	95% goes to platforms	Creators get minimal compensation
<b>No Ownership</b>	Items locked to platforms	Can't transfer, sell, or trade freely
<b>No Transparency</b>	Hidden algorithms	Potential manipulation, no trust

### 3.2.1 Centralized Control

Traditional gaming platforms exercise **complete control** over player assets, achievements, and economic opportunities. Years of progress can be wiped out at the discretion of a single corporate entity.

### 3.2.2 Unfair Revenue Distribution

While players generate billions in value, approximately **95% of revenue flows to platform operators**. Professional gamers and content creators receive only a fraction of the value they create.

### 3.2.3 Limited Asset Ownership

In-game purchases are **not truly owned**. Items, skins, and achievements are locked to specific platforms with no ability to transfer or sell.

### 3.2.4 Lack of Transparency

Matchmaking algorithms and reward systems operate as **black boxes** that players cannot verify or influence.
